your**

# SUCCESS

You make things work. And keep people working. That means countless people are relying on you for jobs and revenue—the fuel to fire up the economy. It's a big job, and you deserve big support.

H2E has your back for all your electrical and automation engineering needs, giving you solutions that improve the health of your plant and your company.

## Experienced team

As former plant engineers and business managers, we've stood in your shoes and know the challenges you face.

Budgets tight? We make what you have work. Ready for an upgrade? We know the best brands, and can tailor a package to fit your operation.

## Customized help

Our understanding of your big picture means we can help at any stage, whether you need simple maintenance or someone to manage a complex construction schedule.

H2E's specialties include:

- Power distribution, especially medium voltage
- SCADA/HMI development
- Energy management
- PLC programming
- Power modeling, studies, and arc flash assessments
- Startup and commissioning

## Trusted talent
